

Press release

November 4, 2005. For immediate release

Introducing: the world's best Anti-Virus software for mobile phones

With the increasing number of Java and Bluetooth enabled cell phones an enormous threat emerges: that of mobile viruses infecting your cell phone.

The severity of this threat is not to be underestimated. One cannot hope to be out of danger. Things may turn worse than most experts suppose. Various mobile devices form the mode of modern life: smart phones, PDA, built-in microcontrollers, household microcomputers, medical implants etc. They are everywhere, they carry out microclimate control, they direct the heartbeat, and they manage a device you speak over. The environment is filled with waves carrying information. A virus appearing in such an environment may cause a lot of damage. It may take control over mobile devices and make them serve its author; it may connect the devices into malicious network and give its author power over you and your world.

There is now a cure for this disease: Mobile Disinfector.

Mobile Disinfector is the most comprehensive solution in the market for protecting mobile devices against viruses, worms and other dangerous malware. It provides real-time on-device protection with automatic over-the-air antivirus updates. High reliability, stable performance and built-in virus self-protection functions distinguish it from similar products of other companies.

Key Features:

- Phone based anti-virus protection;
- Real time scanning of files and messages as they arrive provides immediate protection;
- Protection not only from known viruses but also their possible modifications;
- Heuristic analyzer for unknown Trojans and viruses;
- Self-recovery after any damages, files corruption or virus attacks;

Other Features:

- Manual scan
- Set to auto scan as frequently as you want;
- Auto-starts when phone turned on;
- Always-on background operation;
- fixing file-system errors;
- Advanced help contains FAQ for users regarding phone safety.
- Low memory footprint, especially when operating in background;
- Viewable log;
- 12 months free updates service;
- Multi-language support

The solution is currently available for Series 60 Symbian OS devices.

These devices include: Lenovo P930, Nokia N91, Nokia N70, Nokia N90, Nokia 6682, Nokia 6681, Nokia 6680, Nokia 3230, Nokia 6670, Nokia 6630, Nokia 6260, Nokia N-Gage QD, Nokia 7610, Nokia 6620, Nokia 3660, Nokia 3620, Nokia 6600, Nokia 3600, Nokia N-GageTM, Nokia 3650, Nokia 7650, Panasonic X800, Panasonic X700, Samsung SGH-D730, Samsung SGH - D720, Siemens SX1
Future releases include Microsoft's Mobile OS and Series 80 OS devices

About MPulze

Mobile Disinfector is brought to you by Mpulze, a provider for mobile platforms

MPulze is a leading developer of innovative mobile applications for the Symbian, J2ME, DoJa (i-mode) platforms. The portfolio now contains more than 30 software titles.

MPulze focuses on the following trends in mobile software development:

- Mobile Secure Solutions
- Mobile Business Applications
- Mobile Entertainment
- Mobile Messaging
